

INDUSTRIE MONTAGE

worldwide professional industrial assembly

- mechanical installation
- Machine and plant assembly
- Steel construction work
- Kettle and container
- Working on environmental and air technology
- Mechanical commissioning
- Installation of hydraulic and pneumatic systems
- Welding work
- insulation work

We will advise you as an architect or private clients in a personal discussion. Together your visions and ideas can be specified and checked for their feasibility and evolving. Through our know-how, our flexibility and our unbeatable dynamics we keep the goal always in mind.

Our motto is: sophisticated, individual solution is in any case our goal.

If you would like to discuss your vision with us, please contact info@industrie-montage.com

WE JOB

The structural assembly, centrifugal fans, industrial fans, axial, Pavilions, glass extensions, pool enclosures, elevators, finished canopy, stairs, railings, garages, carport, conveyor technology, plant & -Demolition Mechanical, Be.- venting systems, natural Be.- ventilation systems, slat wall systems, sunscreen, protective grating, partitions & soundproof walls, machinery & soundproof enclosures, cold rooms, isolation rooms and soundproof rooms, maintenance & repair safety devices, flame straightening, welding, warranty support, electro installation

Disassembly and assembly of machinery, plant, equipment, columns, heavy equipment, machinery, containers, pumps, and complete industrial plants. Mounts, mounting and dismounting of pipes, pipe systems and complete piping systems, installation of steel pipes. Maintenance, overhaul, repair and maintenance, and the re-revisions

Service contracts and maintenance contracts, service contracts Worldwide service maintenance: Equipment cleaning and filling, Keg systems, brewing equipment, flash pasteurizer, Pasteurizers maintenance - maintenance, new construction and industrial pipeline construction in the chemical - Pharma.- and food industry, breweries, beverage bottling plants, municipal utilities and waste disposal companies, paper mills, pulp mills, sewage treatment plants, water plants, power plants and power utilities, and other industrial enterprises.

Power plant maintenance, maintenance, reassembly, dismantling and Industry pipeline build in Energy documents, equipment and installation for renewable / renewable energies such as solar, biomass, wind energy, hydropower, and geothermal energy / geothermal) as Bio power, biodiesel plants, fat melting, wind turbines, Photovoltaic-, solar systems etc.

Alignments of pipes, industrial piping. Montage technics: Conveyors, transporters, conveyors

Electronics and Mechatronics: Electricians, electronic and mechatronic control cabinet mounting, measurement and control technology, automation technology, system automation, plant visualization, line routing of cable ducts etc.

Industrial installations in the mechanical engineering, industrial machinery, removals, machinery assembly locksmith work, pipe Before teaching- and welding, steel construction, Locksmith, Adjuster, welders, maintenance mechanics and industrial technicians Plant maintenance, plant maintenance and repair installation service, packaging, food processing technology

Metal art, stainless steel equipment in the food industry and food industry pharmaceutical industry, fine piping, stainless steel pipes, clean rooms and clean rooms etc. Engineering and installation of beverage pipes in the beverage industry and brewing industry, breweries machinability/ Machine Shop: special components, turned parts and milled parts, pipe bending pipe bends, Engineering, Planning. Equipment and piping design.

Construction and assembly management, coordination, Customer, Worldwide delivery, preparation, production, installation, commissioning, training, spare part service and maintenance service factory of its own products.

Removals of complex machines require precise planning and execution. We take over the dismantling of all equipment and the relocation of your machines and equipment to the new location.

We offer here the heavy machinery relocation to 750 tonnes. Our remit with machine moves includes the decommissioning of installations, control technology, hydraulics, electrical systems and pneumatics.

We offer not only machine removals, industrial installations and industrial relocation - even complete operating resolutions are part of our range of services.

If after dismantling your machine is not desired, a reconstruction, we also take over the management of all media and supply lines for you.

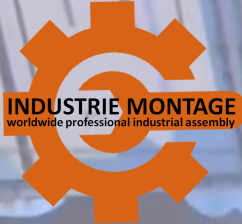

Whether storage systems, machine removals or disassembly and reassembly of all supply lines - in industrial installations and industrial relocation, we offer a complete service.

The labeling of the interfaces is also part of our services in the field of industrial installations and industrial relocation as the photographic documentation and the dismantling of the existing supply lines. Upon request, we also offer the laser surveying.

The broom Clien leaving the work area is a matter of course. The range of industrial relocation includes in-plant machinery transport / machine removals. We are specialized in machinery and incorporations –transport and equipment modifications, including disassembly and reassembly.

Industriemontage, industrial relocation and machine removals we can lift at any scale. We are happy to carry out a non-binding preliminary visit and make you a detailed offer for your industry relocation, including relocation of machinery and industrial installations.

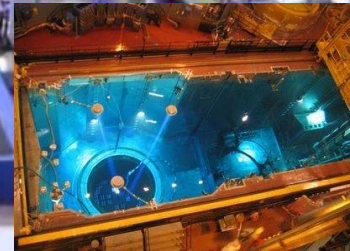

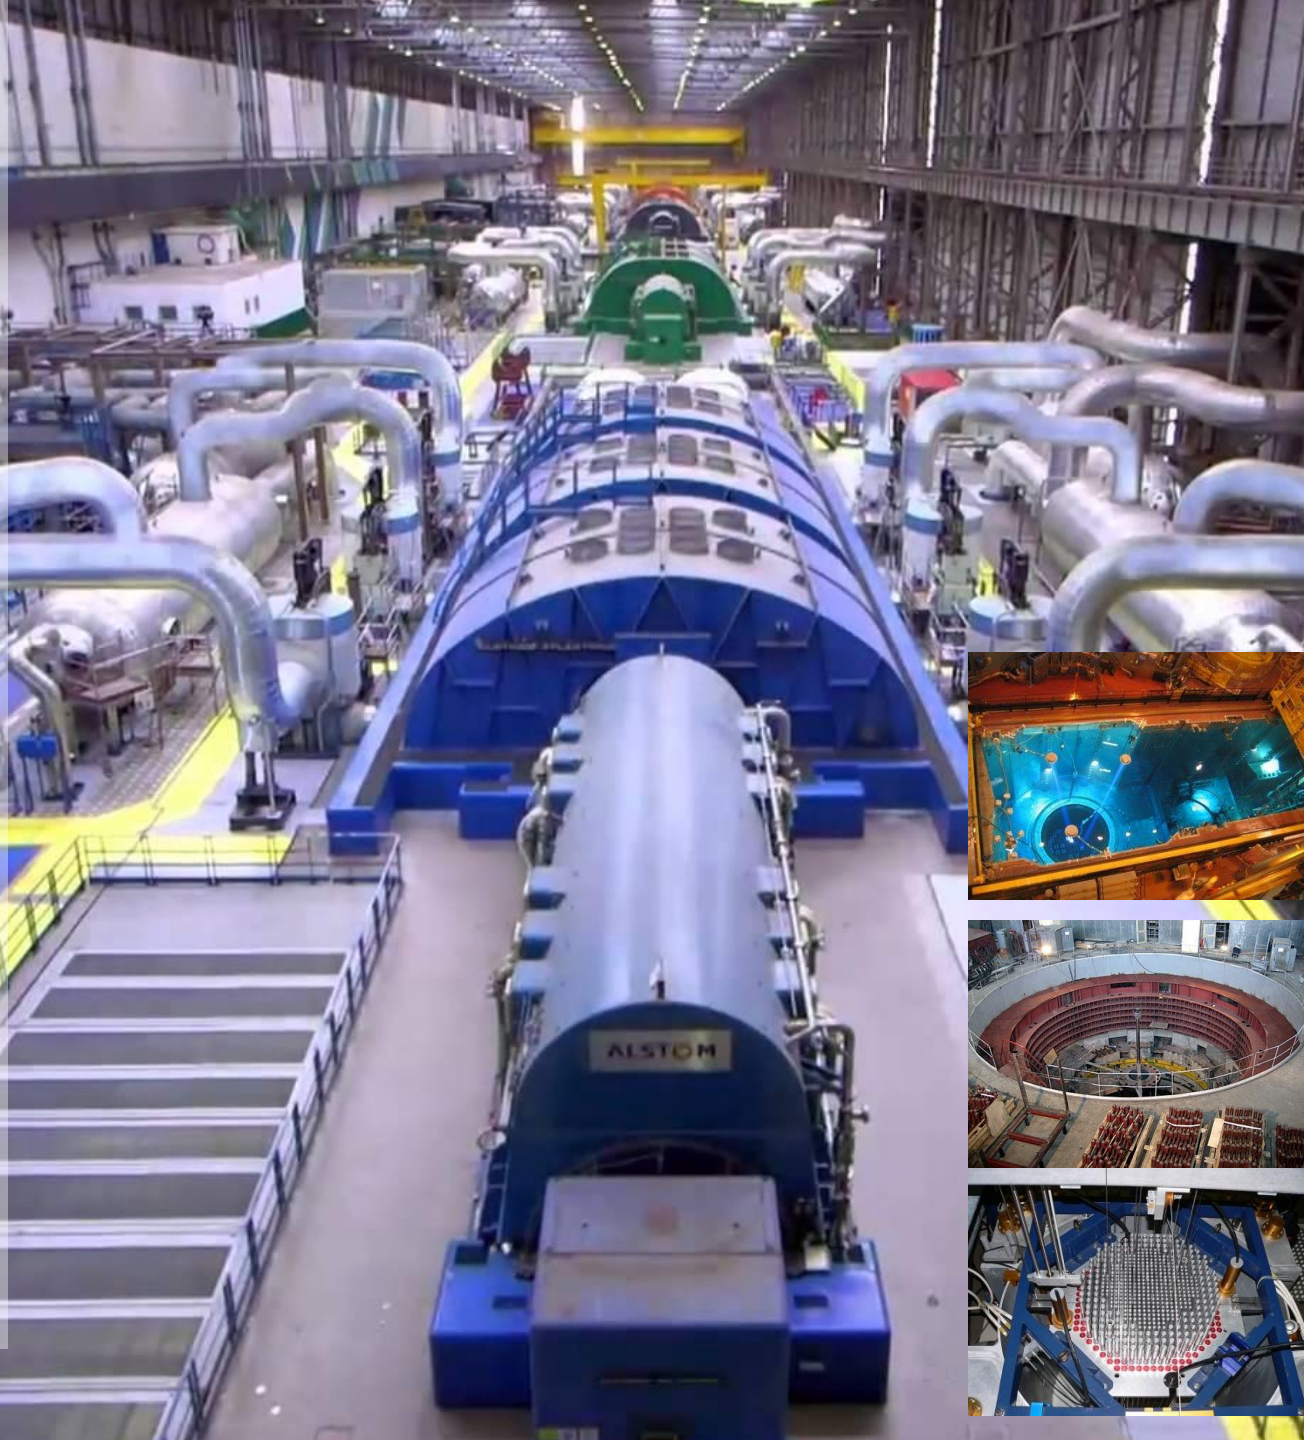

The revisions of turbines, generators and other systems of power plants, the SWISS INDUSTRY is always there for you, so that your plant again can quickly connect to the grid and high availability can be ensured.

To this end, we offer tailored, solution-oriented industrial services for all cycles of power plant and their equipment to. Our experience of many audit projects we have invested more. Our staff will help the high manpower requirements for a revision cover. Of course, all our employees have the necessary training and certification.

To the above-mentioned topic offer the following work.

- Mechanical Engineering
- Process Technology
- Boiler Technology
- Materials Handling
- Turbines, generators, auxiliary equipment
- Metal & steel structures and components

Arrange today for a personal appointment at your place. We will send you a personal offer for the work necessary to you.
